

The world's demand for power keeps growing

Today, the world runs on critical infrastructure and technology. Planes. Hospitals. Factories. Data centers. Vehicles. The electrical grid. These are things people depend on every day. And the companies behind them depend on us to help solve some of the toughest power management challenges on the planet. At Eaton, we're dedicated to improving people's lives and the environment with power management technologies that are more reliable, efficient, safe and sustainable.

We are a power management company made up of approximately 85,000 employees, doing business in more than 175 countries. Our energy-efficient products and services help our customers effectively manage electrical, hydraulic and mechanical power more reliably, efficiently, safely and sustainably. By giving people tools to use power more efficiently. Helping companies do business more sustainably. And by encouraging each and every employee at Eaton to think differently about our business, our communities—and the positive impact we can have on the world.

“At Eaton, we make what matters work. By making power safe, efficient, and reliable, we improve the quality of life for those who experience our products and services. We have the power to make a difference and we do every day”.

Craig Arnold, Chairman and CEO

Our heritage

Eaton has been serving the power management needs of our customers for more than a century. Over the years, we have expanded our expertise and portfolio of products and services by uniting some of the world's most respected names with Eaton's strong heritage of innovation.

A legacy of innovation

It all began in 1911 with Joseph Eaton. In a time when transportation was on the verge of dramatic change, he invested in a new idea -- the very first gear-driven truck axle. More than 100 years later, though our business has transformed and grown significantly, we remain committed to his spirit of innovation.

Over the years, we have also expanded our expertise and portfolio of products, services and systems by integrating the competencies of some of the world's most respected names into Eaton to build the brand you can trust to meet your toughest power management challenges.
