

The **GE Foundation**, an independent charitable organization funded by GE, is committed to transforming our communities and shaping the diverse workforce of tomorrow by leveraging the power of GE. Through Next Engineers, we are committed to increasing the diversity of young people in engineering. We are also inspiring others to act by connecting GE people with communities through our Matching Gifts Program and Disaster Relief. GE STAR awards provide financial support to children of eligible children of GE employees for their achievements.

FHI 360 is a global organization that mobilizes research, resources and relationships so people everywhere have access to the opportunities they need to lead full and healthy lives. With collaborations in over 60 countries, we work directly with local leaders to advance social and economic equity, improve health and well-being, respond to humanitarian crises and strengthen community resilience. We share data-driven insights and scalable tools that expand access and equity so communities can effectively address complex challenges, respond to shocks and achieve thriving futures.

Community Partners play an integral role in carrying out the Next Engineers mission. The GE Foundation carefully selected organizations, including non-profits, community-based organizations, and universities, to implement the Next Engineers initiative in each location. View **Next Engineers Cities** for more information on the community partners in each location.
