The Gaskins Foundation is a non-profit organization that provides extraordinary opportunities for under-recognized and under-represented youth.

Established in 2009, The Gaskins Foundation (TGF) is a 501©3 recognized non-profit organization.

K-3: Present
Introduction to...
- Science, Technology, Engineering, Mathematics (STEM)

4th-6th: Engage
Introduction to...
- Scientific Method
- Engineering Design Process
- Community Projects

7th-12th: Prepare
Introduction to...
- College Prep
- Hands-on Research Experiences

Our expertise provides us with the flexibility to provide the highest level of service to students, teachers and administrators. TGF develops solutions to increase the number of students who are prepared to enter into and matriculate through collegiate STEM programs.
Our main program is STEMulates. STEMulates is a community-centered program, designed to increase the number of engineers and applied scientists in the Cincinnati area over the next 20 years.

Additional Programs

The Young STEMinistas program is a cohort-model program that supports young ladies as they matriculate through their secondary schools and into Science, Technology, Engineering and Mathematics (STEM) careers.

Our Empowering Parents in Community Churches (EPICCC) STEMulation projects operates within local churches. Through this partnership, we are able to strategically host afterschool and weekend programs in several neighborhoods throughout the city.

In partnership with the Cincinnati Recreation Commission (CRC), we host programming at five Cincinnati Recreation Centers. This provides an opportunity to host out-of-school programming to students from across the region.

We are also partner with Cincinnati Public Schools (CPS) to serve as the Community Lead Agency for four schools. As the lead agency, we are responsible for hiring a Community Resource Coordinator who works to secure partnerships and enrichment programs for students in the buildings.

Demographics

**Ethnicity**
- African-American – 95%
- Hispanic – 3%
- non-Hispanic White – 2%

**Gender**
- Male – 52%
- Female – 48%

**Age**
- K-3 – 39%
- 4-6 – 37%
- 7-12 – 24%

Our Founders

**DR. WHITNEY B. GASKINS**
Dr. Gaskins earned a doctorate in Biomedical Engineering and Engineering Education and is considered a fresh new face in the field.

**DELANO M. WHITE**
White is the Executive Director of the program. He is a former Chairman and C.E.O. of the National Society of the Black Engineers.
